

Transport Pro seamlessly integrates with QuickBooks Online (QBO) to make billing and payments a breeze. Enjoy a two-way sync between the platforms. No downloading and uploading files. No manual entry to keep up with both systems.

- 1 Easily sync any existing customers, vendors, billing or settlement codes upon setup. Starting fresh? Transport Pro will create everything on demand for you.

- 2 Transport Pro automatically pushes invoice information to QBO when you bill loads. You'll still do your billing out of Transport Pro, but the info will get pushed to QBO.

- 3 When you receive payment in QBO, the information is automatically pushed back into TP and the load balance is updated. This keeps customer balances accurate, and allows you to use our customer credit system, if desired.

4 When you process pay for carriers or owner operators, the payment information is automatically pushed to QBO as vendor pay, where you can submit true payment however you wish (i.e. check, ACH, etc.).

NOTE: If you're paying a carrier, the factoring company will be picked up upon processing.
